

Mikhail Kovach

Senior Full-Stack & AI Engineer

About Me

A Senior Full-Stack & AI Engineer with 7+ years of experience across production AI systems and full-stack web development. Most recently I built RAG pipelines, LLM workflows and vector search for an engineering-documentation platform with traceable, audit-ready outputs. Earlier work spans e-commerce and telecom platforms integrated with SAP, Oracle and ESB, responsive client interfaces, and backend services and APIs — owned from requirements and schema through build, deployment and maintenance.

Skills

Mobile / Desktop: iOS, Android, React Native, Flutter, Dart, Ionic, Electron, Java, Kotlin, Swift, C++.

Web: React, Next.js, Vue, Nuxt.js, Tailwind CSS, Shaden UI, REST APIs, Express, NestJS, Laravel, Bitrix24, Magento2, WordPress, Shopify, Django, Flask, Spring Boot, AWS, Firebase, Supabase, n8n, NoSQL, PostgreSQL, Redis, Docker, Cloudflare, Nginx.

FinTech: Web3, DeFi, Fireblocks, TradingView, Custody, EVM.

Artificial Intelligence: BitTensor, Subnets, PyTorch, Keras, TensorFlow, Yolo, LLM, Hugging Face, RASA, ChatBot, FastAPI, gRPC, RAG, pgvector.

Tools: VS Code, Claude AI, Android Studio, XCode, Visual Studio, Git, Postman, Google Chrome, Figma, Adobe Photoshop, Sketch, Slack, WhatsApp, Telegram.

Education

- Western Sydney University
Master's, Information & Communications Technology · 2023–2025
- Far Eastern Federal University
Bachelor's, Law · 2017–2021

Professional Certificates

- Software Engineer — HackerRank
hackerrank.com/certificates/ebf24d2faecd
- Frontend Developer (React) — HackerRank
hackerrank.com/certificates/887fe940dd1b
- Python (Basic) — HackerRank

Experiences

AI Developer

Sep 2025 – Sep 2026

Better Futures — Dublin, Ireland · Remote (part-time)

Developed AI-powered automation for engineering documentation on the **EVA™ AI Platform**, designing and implementing solutions with **Retrieval-Augmented Generation (RAG)**, **large language models**, **vector databases** and cloud infrastructure to turn complex engineering information into structured, reliable documentation. Built AI workflows with **traceable outputs**, **validation mechanisms** and audit-ready results, and integrated AI capabilities into production-oriented software systems. Worked across engineering and software teams on maintainable AI solutions aligned to real business and technical requirements — spanning **prompt engineering**, **vector search**, document automation and **API integration**.

Backend Developer & Management

Mar 2024 – Jun 2025

StakOne Pty Ltd — Canberra, Australia · Remote (contract)

Developed and maintained scalable **backend services** and **REST APIs**, designing and optimizing **database structures**, queries and data workflows, and implementing **authentication**, **authorization**, validation and core business logic. Integrated **third-party services** and **external APIs**, troubleshooted production issues and drove measurable improvements to **system reliability**. Alongside delivery, carried **management responsibilities** — reviewing code, coordinating development tasks across the team, planning and prioritizing technical work, and communicating project requirements. Supported releases end to end through **testing**, **deployment** and **ongoing maintenance**, translating business requirements into technical solutions with management and stakeholders.

Frontend & Backend Developer

May 2022 – Jun 2023

CodeIT — Serbia · Remote (part-time)

Built customer-facing interfaces, backend services, business logic and secure data flows for high-traffic enterprise **e-commerce** and **telecom** platforms. On **MTEL**, developed frontend functionality for an e-commerce and **B2B portal** covering telecom product and service purchases, bill payments and prepaid credit management — responsive UI, user workflows and reliable integration with backend services. On **Fonly**, a mobile-phone e-commerce platform, worked as backend developer on integrations with **SAP**, **Oracle** and **DEX** through the client's **Enterprise Service Bus (ESB)**, supporting security and dependable data exchange between systems.

Frontend Developer

Jun 2021 – Apr 2022

Webgate — Bratislava, Slovakia · Remote (part-time)

Built modern, responsive websites for technology and business clients, translating **UI/UX requirements** into production-ready interfaces. Delivered responsive web experiences for **SuperScale**, a technology scale-up, with clean UI implementation, **reusable frontend components** and cross-browser compatibility. Designed and developed **Vacuumgroup.com**, an interactive corporate site featuring a **dynamic timeline** and **job-position filtering** across multiple holding companies, structuring the interface so company information and career openings are easy to navigate. Worked with designers and developers to ship production-ready sites and refined existing frontend functionality as client requirements evolved.

Freelance Software Engineer

Mar 2019 – Apr 2021

Independent — Freelancer.com

Delivered end-to-end web applications and backend services for international clients, owning each engagement solo from requirements and **database schema** through build, **deployment** and handover.
